

IN THE CLAIMS:

Claim 1 and 17-21 were canceled in Amendment A in response to a restriction requirement.

Please cancel claims 2-6 and claims 8-16.

Please amend claim 7.

Please add new claims 22 -25.

Claim 2. (Canceled)

Claim 3. (Canceled)

Claim 4. (Canceled)

Claim 5. (Canceled)

Claim 6. (Canceled)

Claim 7. (Currently amended) [[The]] An air flow through air freshening member for a vehicle cabin air circulating system ~~as defined in claim 5 wherein~~ comprising:

a base strip of porous material, a selected quantity of particulate material having an air freshening substance releasably retained therein, and means retaining said particulate material on said base strip;

said particulate material is located in selected areas spaced apart from one another on said base strip;

said selected spaced apart areas are enlargements in said base strip

said enlargements are pockets;

said pockets are separate members and means attaching said pocket members to said base strip at positions spaced apart from one another longitudinally there along; and

said pocket members are so spaced as to fit within the pleats of an air filter frame suitably shaped for insertion into a vehicle cabin air circulating system.

Claim 8. (Canceled)

Claim 9. (Canceled)

Claim 10. (Canceled)

Claim 11. (Canceled)

Claim 12. (Canceled)

Claim 13. (Canceled)

Claim 14. (Canceled)

Claim 15. (Canceled)

Claim 16. (Canceled)

Claims 17-21 (canceled)

--Claim 22. (New) The air flow through air freshening member for a vehicle cabin air circulating system as defined in claim 7 wherein said pocket members comprise bars having a triangular cross-section and stretching over the entire width of said base strip whereupon such triangular shaped bars fit into and fill said pleats of said air filter frame.--

--Claim 23 (New) The air flow through air freshening member for a vehicle cabin air

circulating system as defined in claim 17 wherein said base strip containing said pocket members comprises a continuous roll of such air freshening material suitable for cutting to length and applying to said air filter frame.--

--Claim 24. (New) The air flow through air freshening member for a vehicle cabin air circulating system as defined in claim 7 wherein said pocket members comprise bars having a rectangular cross-section and stretching over the entire width of said base strip whereupon such rectangular shaped bars fit into said pleats of said air filter frame.--

--Claim 25 (New) The air flow through air freshening member for a vehicle cabin air circulating system as defined in claim 19 wherein said base strip containing said pocket members comprises a continuous roll of such air freshening material suitable for cutting to length and applying to said air filter frame.--
